

Using Web Folders on an Apple Mac

Prerequisites:

- You must have OS X v10.4 (Tiger) or OS X v10.5 (Leopard) installed.
- We would ask that you disable the creation of .DS_Store files on our servers. You can do this with the following procedure:
 1. Open the Terminal.
 2. Type:
`defaults write com.apple.desktopservices DSDontWriteNetworkStores true`
 3. Press Return.
 4. Restart the computer.

It is NOT recommended that you use Web Folders on a public computer (i.e. a public library).

Connecting to the school servers

1. Using Finder, click on *Go - Connect to Server....*

2. If you are a member of staff, enter the following into the server address box:

<https://folders.dorothy-stringer.co.uk/webfolders>

If you are a student, enter the following:

<https://folders.dorothy-stringer.co.uk/studentwebfolders>

Click Connect.

3. Enter your username and password when prompted and click OK.
4. The connection will stay active until you either eject Webfolders (or StudentWebFolders) - using the file menu, or you log off from the computer.
